Banner with parallax

Banner with parallax

Read more

• /

This is a text that explains how to make a meal with many ingredients.

Banner with parallax - setup

Banner with image where text flows over the image.

Setup

Title - First line of the title block

Section - Bookmark on page for short cut in side menu

Title alignment - Sets the title in the middle, on the left or on the right side

Image background - Image used as banner background, overrides the orange default banner background color

Text short: short word separated with a / from link - In this example 'Read more' is a clickable link, the separator (backslash) separates the link from the text that follows

Reverse title and text - When box is activated, the title and text swap sides

Link properties - Where a link can be defined, in this example 'Read more' is the link leading to the internal page 'How to become a business partner'. This link can also be an external webpage

Title color - Color for title

Text color - Color for the text following after link and backslash

Link text color - Color for the link text, in this example 'Read more'

Separator color - Color for / (backslash) in this example set to red

Padding vertical - A number that defines the height of the image

Show block - When to show the title (see more info here)

Banner custom

Here the left side next to the image has a 'Text column' option inserted but it could alternatively have been another type of content. e.g. a Video or Icon column.

u put an image to either the left or the right side, and you can basically insert anything else on the other side... and it still works with smartphor

In this example the specifications for the 'Text column' are: text color is white, border color is red, the border thickness is 4 and the background is dark grey. But it could also have been white text on black background with no border color.

Banner Custom - screensho

Banner with image at either right side or left side combined with some other content on the opposite side.

Setup

Title - This title is not shown on the banner

Image - Image used in either the left or right side of the banner

Section - Bookmark on page for short cut in side menu

Image right - When box is activated, the image will be on the right. If not, the image will be on the left side.

Image size in pixels - Choose between 8 different image sizes

100% width - Decide if an image placed on the right side should be rendered with 100% width to the right side and vice versa for an image placed on the left side.

Small vertical margin - When box is activated, the space between the bottom of title box and the top of the image is very limited, this also applies for the space between the bottom of the image and the following element, e.g. beginning of another banner

Background theme - Choose between a dark or light background

Item - On the opposite side of the picture other content can be inserted, e.g. text as in this example. But it can also be other types of content, e.g. an image or a video

Show block - When to show the title (see more info here

Banner Custom - screenshot - Search options

Search options shows the various possibilities that can be inserted next to the image in a 'Banner custom'. The example chosen above is a text column but it could alternatively be e.g. a video, an icon box column, a table column, etc.

Search options... H Title column Icon box column Image before and after ≣ Text column column Image and text column Banner H2 Banner column Counter 0.0 Counter % bar column ↓5 Counter column Entity 0 0 Partner Ê Job 0 0 Customer Event 0 0 User Ê Real estate column Other </> HTML Table Table column Tabs Accordion column ••• Video Video column O

This screenshot shows the item part of the 'Custom banner' from the above example. It is 'Text column' option that is used, but it could alternatively have been another type of content. e.g. a Video or Icon column.

Column title - Here a title for the 'Text column' can be defined, this title can be shown or hidden. Background as well as title color can be defined.

Text - HTML formatted text is inserted here. In the example above, the text used is "Here you put an image to either the left or the right side, and you can ... "

Text alignment - The text alignment can be either Left, Right, Center or Justify

Choose color for your text - choose between 10 different colors

Large first letter - If this option is activated, the first letter will be large but it cannot be edited in the text field (e.g. as bold bold or H2)

First letter color - If the 'Large first letter' option above is selected, the color of the first letter can be defined here

Column preferences - Here it is possible to choose between 4 different sizes of the column to define how big the column should be. Also the border thickness can be defined in pixels, if set to 0, there will be no border. Border and background color can be defined, in the above example the border color is red, the border thickness is 4 and the background is dark grey

Again, this can be sorted with counter, title, text or title, text, counter or any other combination of the three. We will place the counter in the middle this time.

Banner 3 col counter - screenshot

Banner with a counter in 3 columns, this can be sorted with counter, title, text or title, text, counter or any other combination of the three. In the example the counter is placed in the middle, the title to the left and the text to the right.

Setup

Title - The title with large letters

Sub title - Sub title with smaller letters below the main title

Text area - the main text, in this example placed on the right side of the counter

Section - Bookmark on page for short cut in side menu

Count - Set a number, in this example we are counting up to 252

Count text - Text below the counter, in this example 'Visits per month'

Count speed - the count speed effect in milli-seconds - in this example 2000 ms

Background color - Choose between 9 types of background colors, in this example Dark Grey Counter color - Choose between 9 types of colors for the counter, in this example white

Title below count color - Choose between 9 types of colors for the text below the counter, in this example white

Title color - Choose between 9 types of colors for the counter, in this example white

Sub title color - Choose between 9 types of colors for the counter, in this example white

Text color - Choose between 9 types of colors for the counter, in this example white

Element order - Choose between any sorting order of 'Counter', 'Title', 'Text', in this example 'Title' is to the right, 'Counter' is in the middle and 'Text' is to the right.

Small vertical margin - Minimize top and bottom margins and use less space on the page

100% width - When this option is selected the banner has 100% width

Show block - When to show the title (see more info here
