Map block

Map block - screenshot

Integration of Google maps on a page with a specific latitude and longitude inclusive of a popup item for a specific location

## Setup

**Title** - The title of the map, thi is not visible on the page but each map used must have a unique title

**Slug** - Use lower case of title

**Height** - The height of the map in pixel

**Latitude** - Use a Google Map latitude to center the map

**Longitude** - Use a Google Map longitude to center the map

**Zoom** - The zoom level for the map, lower number gives a more zoomed out result

**Is fullscreen** - When selected, the map will show is fullscreen format

**Small vertical margin** - Minimize top and bottom margins and use less space on the page

**Background theme** - Choose between a dark or light background

**Show block** - When to show the title (see more info [here](#))

## Setup of Map item

**Title** - The title for the popup item, in this example the Cathedral

**Text** - Text about the the popup item

**Image** - The image of the popup item

**Latitude** - Use a Google Map latitude for the popup item

**Longitude** - Use a Google Map longitude for the popup item

**Type** - This refers to the marker on the map, choose between circle and font-awesome. See the 'font awesome 5' icon library, reference guide for icons is available at [font awesome 5 icons](#)

**Size** - The size of the marker

**Icon** - The 'font awesome 5' icon used here is 'map-marker'

**Color** - The color of the map marker (e.g. the circle)

## Map

### Title \*

Title, used in admin headline, it must be unique to each map used

### Slug

Title automatically rewritten to programmable name

### Height \*

Height of map

### Latitude \*

Pick latitude to center map at

### Longitude \*

Pick longitude to center map at

### Zoom \*

Zoom level for map, lower is more zoomed out

### Is fullscreen

Should map be rendered fullscreen?

☐

### Small vertical margin
