

Streamblocks category Video blocks

Video

Video - screenshot

A simple video embedment, where there can be linked to YouTube video or an externally or internally stored mp4 video. Various video settings can be specified, e.g. auto play, with or without video control, auto start etc.

Setup

Choose between either a link to a youtube video (**YouTube video ID**) or a link to an externally stored mp4 video (**Video location**) or point to an internally stored mp4 video (**Video**). If more than one of the above mentioned three choices are used, the Youtube video ID will override the other options.

YouTube video ID - the link to a youtube video, that is the last part after the '?v=' in this example "93-oK5RIKik"ipart of the full youtube URL as in <https://www.youtube.com/watch?v=93-oK5RIKik&t=4s>

Video location - link to an externally stored mp4 video

Video - select an internally stored video

Height* - Specify the height of video in px

Autoplay - If this is selected the video will start automatically

User controls - If this is selected the video control will be shown

Loop - If this is selected the video will automatically replay once its finished

Playsinline - If this is selected the video will play inline on mobile devices instead of going full screen

Preload - If this is selected, video will be preloaded which makes the page slower

YouTube video ID

YouTube video ID. If more than one type of video is used, none will show.

93-oK5RIKtk&t

Video location

Where is your external .mp4 video located. If more than one type of video is used, none will show.

Video

Select an internal .mp4 video file or upload a new one. If more than one type of video is used, none will show.

Autoplay

Should your video autoplay?

☒

User controls

Should your user have video controls?

☐

Loop

Should your video automatically replay once its finished?

☐

Playsinline

Will video play inline on mobile devices instead of going full screen

☐

Preload

Make page faster by not preloading, if checked video will be preloaded which makes page slower

☐

Banner with full width video

Banner with full width video - screenshot

A more advanced video embedment with possibilities to add title and text. Various video settings can be specified, e.g. auto play, with or without video control, auto start etc.

Title - The title of the video, in this example 'Varna aerial view'

Text - Additional text can be inserted here, in this example 'various arial views of Varna'

Section - By adding a name here, this can be used to target CSS for this page

Choose between either a link to a youTube video (**YouTube video ID**) or a link to an externally stored mp4 video (**Video location**) or point to an internally stored mp4 video (**Video**). If more than one of the above mentioned three choices are used, the Youtube video ID will override the other options.

YouTube video ID - the link to a youtube video, that is the last part after the '?v=' in this example "93-ok5RIKtk"ipart of the full youtube URL as in <https://www.youtube.com/watch?v=93-ok5RIKtk&t=4s>

Video location - link to an externally stored mp4 video

Video - select an internally stored video
